The Finest Short Game Tools in Golf

Vokey Design wedges are the finest short game tools in golf, each meticulously created by master craftsman Bob Vokey.

Designed to meet the demanding requirements of the PGA Tour and all serious golfers, Vokey wedges can be fit to meet any short game yardage requirement, swing style, course condition or appearance preference. Vokey Design wedges are available in a variety of loft, bounce, camber and sole width configurations to fit every style of play.

Vokey Design wedges. The choice for bunkers, heavy rough, hardpan – and other perfect lies.

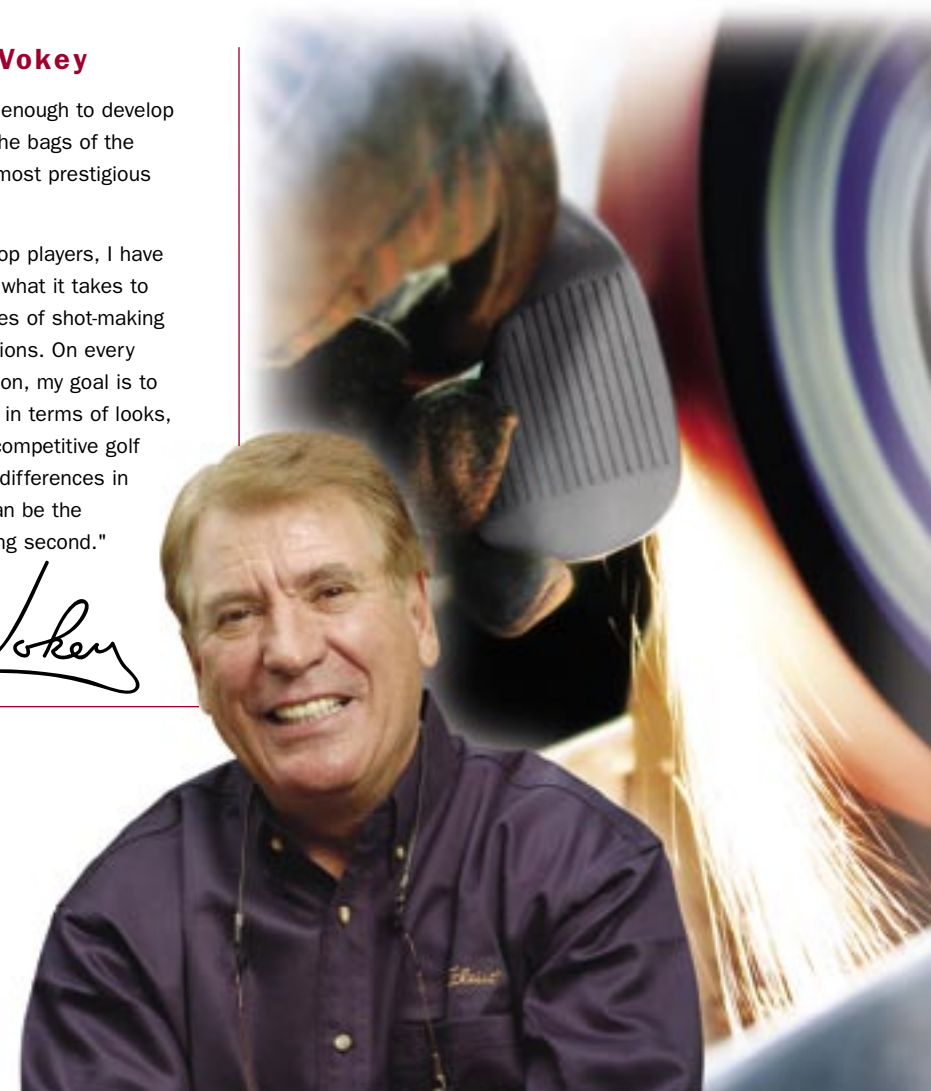

Master Craftsman Bob Vokey

“For over 20 years, I’ve been fortunate enough to develop wedges that have made their way into the bags of the world’s greatest players at the world’s most prestigious tournaments.

By working with and listening to these top players, I have developed a thorough understanding of what it takes to develop wedges that perform for all types of shot-making styles and for all types of course conditions. On every wedge I grind, shape and put my name on, my goal is to create a scoring tool that is unmatched in terms of looks, feel and performance. At the levels of competitive golf I deal with on a day-to-day basis, small differences in performance can mean everything. It can be the difference between winning, and finishing second.”

Bob Vokey

SPIN MILLED™ WEDGES

Vokey Design® Spin Milled Wedges

Greater stopping power and control. These are the performance advantages of Vokey Design Spin Milled wedges.

By working with Tour players to create wedges that perform under the toughest major championship conditions, Bob Vokey has developed a family of wedges that feature precisely machined grooves and a roughened face texture to impart greater spin on full and partial wedge shots. Tour validation and testing have proven that Vokey Design Spin Milled wedges deliver 10% more spin in dry conditions, and up to 85% more spin in wet conditions than a wedge with conventional grooves.

Available in two finish options, in lofts of 54°, 56°, 58° and 60°, Vokey Design Spin Milled wedges are the perfect fit for serious golfers looking for added control and greater shot-stopping ability.

A circular cutting tool creates precisely machined grooves with a steeper draft angle for 30% more volume than conventional grooves.

200 SERIES WEDGES

Vokey Design® 200 Series Wedges

Vokey Design 200 Series wedges feature a classic teardrop profile with a high toe and shallow heel, and are available in two finish options to satisfy the discriminating appearance preferences of serious golfers.

Vokey Design 200 Series wedges with the Tour Chrome™ finish provide a classic, chrome finish with a Tour-preferred, glare-reducing satin appearance. The Oil Can finish is a cosmetically unique, hot oil oxide process applied to the wedge that will wear off over time, leaving a raw finish with soft feel.

Available in pitching, gap, and sand wedge models from 48° to 60°, Vokey Design 200 Series wedges can get it up-and-down from any lie.

VOKEY DESIGN® WEDGE DESCRIPTIONS

248.06

Slight offset, moderate sole camber and a high CG promote controlled full shots from the fairway. Excellent for green-side chipping and bump-and-run shots.

250.08 & 252.08

Slight offset and medium bounce allow these wedges to perform well from hard packed sand or for long bunker shots. Moderate sole camber promotes controlled shots from the fairway. Excellent for green-side chipping.

254.10 & SM54.10

Medium bounce and a narrow sole allow these wedges to be opened or closed for a variety of shots from grass or sand. Ideal for long bunker shots or firm conditions. Outstanding fairway wedges. Spin Milled version creates more spin and control into and around the greens.

254.14 & SM54.14

High bounce and a wide sole make these wedges good for soft sand and turf conditions. Ideal for steeper swinging, aggressive players. Excellent full shot fairway wedges. Spin Milled version creates more spin and control into and around the greens.

256.10 & SM56.10

Medium bounce, and a thin sole with slight heel-to-toe radius and relief along the trailing edge allow these wedges to be easily opened to slide under the ball. Ideal for players with shallow attack angles. Excellent for firm conditions. Spin Milled version creates more spin and control into and around the greens.

256.14 & SM56.14

High bounce, less camber and a flat, wide sole maximize the effective bounce area for players with steep attack angles. Excellent from deep rough, deep grass and soft sand. Spin Milled version creates more spin and control into and around the greens.

258.08 & SM58.08

Moderate sole width and less camber make these excellent all-around sand and fairway wedges. Ideal for short pitch shots. Higher lofts allow these wedges to be used for delicate lob shots. Spin Milled version creates more spin and control into and around the greens.

258.12 & SM58.12

High bounce and a wide sole with less camber make these excellent all-around sand wedges. Ideal for soft conditions and for players with steep attack angles. Higher lofts allow these wedges to be used for delicate lob shots. Spin Milled version creates more spin and control into and around the greens.

260.04 & SM60.04

Low bounce and moderate sole width with slight camber promote crisp ball contact from tight lies. These wedges can be opened without raising the leading edge and perform well from firm conditions. Spin Milled version creates more spin and control into and around the greens.

260.08 & SM60.08

Medium bounce and a wide sole that is fuller across the toe and heel enhance playability from deep grass or sand. Excellent for soft course conditions. Spin Milled version creates more spin and control into and around the greens.
